## GUIDrive™ with RoboForm Included

GUIDrive™ software adds a fully brandable Start Menu to a flash drive. This gives the user many reasons to use and re-use the drive:

- Easily organize drive content
- Backup and restore important data
- Use other host computer without leaving "Footprint"

### The Advertiser

- Has repetitive brand exposure
- Can lock drive content with GUIDrive™
- Can load PowerPoints, web links and other presentations that will stay on the drive as long as GUIDrive™ is on the drive
- Gets a much better ROI than any blank drive

### It's easy to use

- Award-Winning, market leader Password Manager portable s/w application
- No expensive setup
- No need for special programming
- No subscription fees

*Call today and let us GUIDE you in the right direction!*

Take it for a test drive!

[Download Now >>](#)

1. Download and unzip
2. Drag all files and folders into main directory of a blank flash drive
3. Eject the drive from computer
4. Plug drive back into computer
5. When prompted to do so click "Start GUIDrive™"

**RoboForm**  
Remembers Passwords So You Don't Have To
