

Flash Memory (Custom OEM)

The Idea (Step #1)

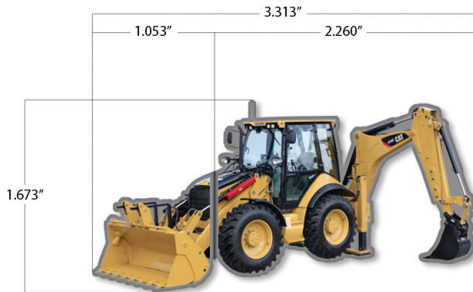

Have you ever found a product and wished it could be customized just for you? Through MMI, you can. We can even design a new product completely from scratch. Just tell us what you need and we'll provide you with a solution. If you are concerned about the cost, you shouldn't be. It's surprisingly affordable, especially when you consider your return on investment for having a promotion unlike any of your competitors. The samples on this page are just a couple examples of some of MMI's past projects.

The Rendering (Step #2)

The Finished Product (Step #3)
